

REMARKS

After entry of the foregoing amendment, claims 1-18 and 32-33 remain pending in the application.

The amendments to claims 1 and 7 redress § 112 issues noted in the February 10, 2006, Action. These issues arose from the previous amendments to those, or related, claims. The undersigned apologizes for such errors. No new limitations are added by the present amendments.

The undersigned expects to file a Notice of Appeal in this application. Presently, all claims stand rejected over Jansen (6,243,450), either alone, or in combination with Jacobson (6,243,450).

Reference was made in the Action to a patent to King (6,904,450). However, King was not made the basis for any rejection. If the Examiner wishes King to be considered by the Board, he is invited to issue a new (non-final) rejection that relies in some manner on King.

Date: April 4, 2006
